

I urge you to reject the NAB petition 04-160. I have XM Satellite radio and I enjoy the local weather and traffic. I can see no reason why XM radio should not be allowed to send whatever information they like to their subscribers.

I have the choice to listen to whatever station I choose. If the local stations offered the content that I preferred - I would listen. They don't and I choose XM. Government regulation should not be used to limit free consumer choice.
